

Maksym Jakubowski

Fullstack Developer (React & Node.js)

Email: maksym.jakubowski.dev@gmail.comLocation: Szczecin, Poland / Remote

Portfolio: <https://maksym.jakubowski.pl>Github: <https://github.com/maksym-jakubowski>

LinkedIn: <https://www.linkedin.com/in/maksym-jakubowski/>

Passionate Fullstack Developer with a strong foundation in modern web technologies (React, Node.js, TypeScript). Returning to the tech industry with a refreshed, highly current skill set, building scalable, modern web applications. Adept at creating responsive interfaces with Tailwind CSS, developing robust REST APIs, and managing database architectures. Combines prior professional IT experience in the UK and Poland with a strong, disciplined work ethic to deliver high-quality code and great user experiences.

TECHNICAL SKILLS

Frontend:React, TypeScript, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, jQuery, Responsive Web Design

Backend:Node.js, Express.js, NestJS, REST APIs, PHP, Socket.io

Database & Tools:PostgreSQL, MySQL, Git, Docker, Postman, npm, Supabase, VSCode

RECENT PORTFOLIO PROJECTS

Task Manager App2026

React | Node.js | TypeScript | PostgreSQL | Socket.io

- Developed a comprehensive fullstack task management application featuring a Kanban board and team workspaces.
- Implemented real-time bi-directional updates and event-driven architecture using Socket.io.
- Designed a responsive, user-friendly interface enabling seamless workflow management and productivity tracking.

AI Content Generator2026

React | Node.js | OpenAI API | PostgreSQL | Tailwind CSS

- Engineered an AI-powered SaaS application for generating high-quality marketing content and product descriptions.
- Integrated the OpenAI API to dynamically process user prompts into ready-to-use social media copy.
- Styled a modern, clean interface exclusively with Tailwind CSS, ensuring accessibility and mobile responsiveness.

Real-Time Chat App2026

React | Node.js | Recharts | PostgreSQL | Supabase

- Built a modern chat application supporting instant real-time messaging and user authentication.
- Leveraged Supabase for secure backend-as-a-service (BaaS) and real-time database subscriptions.
- Incorporated data visualization features using Recharts to display user engagement and messaging metrics.

PROFESSIONAL EXPERIENCE

Fullstack JavaScript Developer

Mar 2026 - Present

Self-employed / Remote

- Designing and developing modern, scalable web applications from scratch using the MERN/PERN stack.
- Continuously updating technical proficiency by adopting TypeScript, Tailwind CSS, and advanced React hooks.
- Building out a comprehensive portfolio of fullstack apps to demonstrate modern architecture patterns and clean code practices.

Logistics & Operations (Various Companies)

2019-2026

Took a planned career pause from IT to work across Europe (Amazon, OBI, etc.). Maintained strong organizational, teamwork, and reliability skills in high-volume environments before returning to software development.

Software Engineer

2016 - 2019

Courts Design / MBS | Hartley Wintney, UK (On-site)

- Developed and maintained responsive web applications, working closely with cross-functional design and technical teams.
- Utilized JavaScript, Angular, HTML5, and MySQL to deliver robust software solutions for clients.
- Optimized web performance and ensured cross-browser compatibility across multiple active projects.

Senior Web Application Developer

2013 - 2015

Jankis Design / Freelance | Szczecin, Poland

- Delivered end-to-end custom web solutions tailored to specific client requirements using PHP, Sass, and JavaScript.
- Managed project lifecycles independently, from initial architecture planning to final deployment and support.

EDUCATION

Technikum Informatyczne SCI

IT Technical School | Hardware & Office Software
